- forms are available at the Town Office for decks, garages (attached and detached), and additions which show what building information is required
- at least a two-week time should be allowed for review of the application by the Building Official
- a building permit is valid for one year from the date of approval
- fee-based on the value of construction (which includes labour); Building Official has a square foot rate they use based on work being undertaken for determining the value of construction.

Development:

- A development permit application needs to receive approval prior to the building permit being submitted to the building official.
- Development permit deals with building setbacks, building location, size and usage (as per the Zoning Bylaw)
- Landscaping – a lot to be graded and levelled to provide for adequate surface drainage which does not adversely affect the adjacent property.

Plumbing and Electrical Permits

Plumbing: to be approved by Public Health Inspector, needs to be applied for by a Journeyman Plumber, fees set by Province and submitted to Cypress Health Region; required for new work or extensive renovations. The building permit Plan Check letter will include whether plumbing is required.

Electrical: applied for by electrician – Town is not involved in any way other than Plan Check letter with Building Permit may include the requirement for an electrical permit.

Demolition/Moving Permits

- required when building or accessory building being moved or demolished
- damage deposit will be required in most cases when a building is being demolished or moved out of Town; value of \$250.00 or more depending on size/condition/location, etc.
